Forecast for Wednesday 01 Jun 2022

Weather: Frequent heavy and possibly thundery showers may merge to give some longer spells of rain during the early hours of Wednesday, but will ease around dawn before clearing eastwards by mid-morning. Sunny spells and isolated light showers during the middle of the day, but becoming dry by mid-afternoon with lengthening sunny intervals and with skies clearing by evening.

Chance of cloud-free hill tops above 800m: 40% at first improving to 90% or better mid-morning onwards.

Low Cloud and visibility: Areas of cloud occasionally covering slopes above 400-500m during the early hours and at first Wednesday morning, but lifting and breaking to small amounts nearer 700m by mid-morning and then clear of the summits during the afternoon and evening. Visibility beneath cloud generally good, but deteriorating to locally moderate or poor in rain and showers.

Freezing Level*	1500m	1400m	1400m	1400m	1500m	1500m	1500m	1500m	1600m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

It will feel close to or just below freezing on the summits during the morning, so warm layers are recommended as well as waterproofs. UV levels will be high in any sunshine during the afternoon, and sun protection is recommended to protect your skin.

Forecast for Thursday 02 Jun 2022

Weather: Early valley mist and shallow fog patches will clear soon after dawn leaving a fine start to the day with largely sunny skies. Scattered cloud will build mid-morning onwards giving occasionally cloudier skies and the risk of the odd light shower for a time during the middle of the day. Dry with clear spells in the evening.

Maximum wind: Southerly 10-15mph.

Chance of cloud-free hill tops above 800m: 100%

Low Cloud and visibility: Cloud remaining clear of the summits throughout the day. Locally poor visibility in any mist or shallow fog at first otherwise generally excellent visibility at all levels.

Temperature: **Valleys:** Plus 4 Celsius becoming plus 17 Celsius.
At 800m: Plus 6 Celsius becoming plus 10 Celsius.
Freezing level: Above the summits.
